LEXINGTON, VIRGINIA CAPITAL IMPROVEMENTS PLAN FY2022 – FY2026

300 East Washington Street • Lexington, Virginia 24450

Phone: 540-462-3700 • Fax: 540-463-5310

To: Honorable Mayor and City Council

From: James M. Halasz, City Manager James M. Italasz

Subject: FY22-26 Five-Year Capital Improvements

Date: Plan March 22, 2021

I am pleased to present to you the proposed FY22 five (5) year Capital Improvements Plan (CIP). This proposed CIP includes \$8,250,919 in FY22 in General Fund and Utility Fund projects.

In FY22, the City will schedule \$190,000 for City-wide street resurfacing, along with \$343,676 in repairs for the Ross Road bridge. Funds have also been programmed for other City-wide needs including sidewalk repair and replacement, pool improvements, and playground upgrades. Further, \$82,832 for the City's cost share of capital projects at the Rockbridge Regional Jail are proposed in this plan.

For the Utility Fund, Phase 1 of the Diamond Hill Area Water and Sewer project is planned, with water line replacement recommended for sections of Washington, Massie and Randolph Streets. Wastewater projects include areas of Ruff Lane, North Randolph and Parry Lane, Tucker, Massie and East Washington Streets). Additionally, the design portion of the Phase 1 Jackson Area Water and Sewer project is proposed. Approximately \$619,000 in inflow and infiltration (I&I) reduction projects is also planned for FY 22.

| Requesting Department: | Commissioner of the Revenue |
|------------------------|---|
| Category: | Real Estate Assessment |
| Title: | CAMA Software for Commissioner of the Revenue |
| Status: | Updated |

| Description: | Replace current CAMA (real estate assessment software) with new CAMA software that does not operate on AS400. |
|--------------|---|
| | |
| | |
| | |

| Justification: | Current real estate software operates on AS400. The real estate software is the only software |
|----------------|--|
| | that is being currently run on the AS400. Software is outdated and needs to be replaced. It is |
| | not known how long current software provider will be in business. |
| | |
| | |
| | |
| | |

| Strategic | Vision V: Goal I: Increase and diversify community involvement and civic awareness |
|-----------|--|
| Plan: | |
| | |
| | |
| | |
| | |
| | |

GF-151

| Requesting Department: | Fire |
|------------------------|---|
| Category: | Fire Department |
| Title: | Confined Space Communications Equipment |
| Status: | No change |

| Description: | This is a hardwired intercom type communications system used to connect rescuers inside the confined space with outside emergency personnel. |
|--------------|--|
| | |
| | |

Justification: OSHA requires a means of communications between the rescuers operating inside the confined space and the outside support and rescue personnel. Portable radios do not work inside of most confined space structures due to inability of the radio waves. This will complete the equipment needed for LFD to begin training and certification of personnel for confined space rescue. In addition we plan on including the Public Works personnel in the training as they are the most at risk workers locally who enter confined spaces for routine work and may need rescue.

| Strategic | Vision IV: Goal IV: Provide and improve infrastructure |

| Requesting Department: | Public Works |
|------------------------|-------------------------|
| Category: | Bridges |
| Title: | Ross Rd. Bridge Repairs |
| Status: | No change |

Description: Perform strategic repairs to the Ross Road Bridge over Sarah's Run (Non NBI Structure). This bridge is of the single reinforced concrete slab span design. This structure has been rated in "FAIR" condition, but repairs are recommended to maintain the bridge's structural integrity, safety and reliability. These repairs include patching all spalled and delaminated concrete throughout the structure, milling and repaving wearing course asphalt pavement, epoxy coating concrete deck, sealing cracks on the underside of the deck, and remediation of abutment

undermining.

Justification:

This structure is of unknown age. Its concrete slab span exhibits areas of cracking, spalling and delamination. Concrete bridge abutments, wingwalls, breastwalls, and parapets display evidence of cracking, spalling, and delamination. Bridge abutments show evidence of undermining. This bridge was inspected by the City's structural consultant, Schwartz and Associates. The repairs outlined herein are per their recommendation.

Strategic
Plan:
Vision IV: Goal IV: Provide and improve infrastructure; Vision II: Goal IV: Maintain and update infrastructure and align fees with costs

| Estimated Annual Operating Cost: | n/a |

| Requesting Department: | Public Works |
|------------------------|--------------------------------|
| Category: | Streets Parking, and Sidewalks |
| Title: | Downtown Enhancement Plan |
| Status: | No change |

| Description: | This project is intended to provide funds to implement ideas from the Downtown Enhancement |
|--------------|--|
| | Plan. Funds are targeted to smaller projects over the next years. |
| | |
| | |
| | |
| | |
| | |

| Justification: | Like any infrastructure, the public facilities in the City's Downtown Area need continued |
|----------------|---|
| | investment and upgrade. The Downtown Enhancement Plan, accepted in FY14 outlined |
| | numerous ideas to improve its attractiveness, enhance pedestrian accommodation, and promote |
| | economic viability. Work completed to date has been well received. |
| | |
| | |
| | |

| Strategic | Vision IV: Goal III: Provide and improve pedestrian and bike accomodation and awareness; |
|-----------|--|
| Plan: | Vision II: Goal I: Exert positive influence on regional economic development |
| | |
| | |
| | |
| | |
| | |

| Estimated Annual Operating Cost: | n/a |
|----------------------------------|----------|
| Work Performed: | Contract |

| | Funding Summary | | | | | | |
|-------------------|-----------------|---------|---------|---------|---------|-----------------------|-----------|
| Funding Source | 2021/22 | 2022/23 | 2023/24 | 2024/25 | 2025/26 | Not Yet Programmed | Total |
| General Fund | 25000 | 0 | 25000 | 25000 | 25000 | \$ 0 | \$100,000 |

| Requesting Department: | Public Works |
|------------------------|--------------------------------|
| Category: | Streets Parking, and Sidewalks |
| Title: | Sidewalk Repairs- City-wide |
| Status: | No change |

| Description: | Provides funding to augment annual sidewalk repair and reconstruction. | Includes curb and |
|--------------|--|-------------------|
| | gutter where needed. | |
| | | |
| | | |
| | | |

Justification: The city has about 18 miles of sidewalks. Many are in poor condition and in need of reconstruction or repair. Majority of sidewalks are concrete construction, but a number of neighborhoods, particular older ones, have brick surfaces, which also need repair. Prior funding coupled with this year's request will return sidewalks to a good sate of repair. Good sidewalks enhance neighborhood quality of life, safe walkability, and ADA accommodation.

Strategic
Plan:
Vision I: Goal I: Increase accessibility for the disabled and continue efforts to achieve compliance with Americans with Disabilities Act; Vision I: Goal IV: Improve walk-ability and bike-ability for recreation and transportation; Vision IV: Goal III: Pro

| Requesting Department: | Public Works |
|------------------------|--------------------------------|
| Category: | Streets Parking, and Sidewalks |
| Title: | Street Resurfacing- City-wide |
| Status: | Updated |

| Description: | Provides funding to augment annual street resurfacing program. Additionally, funding may be applied to these roadways with repaving needs that are not included in the VDOT street inventory. |
|--------------|---|
| | |

Justification: The pavement condition of many city streets is poor. Ride quality and safety are impaired. Annually the City receives funding from the State for street maintenance, but this funding only covers about 75% of needs. This shortfall equates to about \$200,000 dollars annually. Over many years this under-funding resulted in a significant backlog of resurfacing needs. The city has 50 lane miles of streets for which state funding is received. Additionally, there are 10 lane miles of city streets for which no state funding is received.

| Strategic | Vision IV: Goal IV: Provide and improve infrastructure; Vision II: Goal IV: Maintain and |
|-----------|--|
| Plan: | update infrastructure and align fees with costs |
| | |
| | |
| | |
| | |
| | |

| Estimated Annual Operating Cost: | Expected reductions in annual maintenance and repair. |

| Requesting Department: | Public Works |
|------------------------|---------------------------------|
| Category: | Streets, Parking, and Sidewalks |
| Title: | Repave City Hall Parking Lot |
| Status: | Updated |

| Description: | Deficient City Hall parking lot pavement areas will be patched with 4-inches of VDOT BM-25 |
|--------------|--|
| | base asphalt. Once complete the entire lot, Police Department parking included, will be milled |
| | and resurfaced with 2-inches of VDOT SM-9.5A asphalt pavement. Exisiting pavement |
| | markings will be replaced in like kind. |
| | |
| | |
| | |

| Justification: | This parking lot's pavement section has surpassed its desing life. Several locations exhibit signs of subgrade failure, pavement oxidation, and seam raveling. | Ì |

|------------------------|-------------------------|
| Category: | Stormwater |
| Title: | Stormwater Improvements |
| Status: | No change |

| Description: | The City has many areas where the stormwater collection system needs to be improved. Some are for streets where ashalt berms have been used to control run-off, which are proving to be inadequate and some are araes where the underground lines are inadequately sized or in failing structural condition. |
|--------------|--|
| | |

| Justification: | The City's stormwater collection system has areas that are insufficient to handle 10-year-design storm events and consists of some very old infrastructure that is failing. Runoff from rainfall events can cause property damage and reduce the neighborhood quality of life. This important component of city infrastructure needs attention. |

|------------------------|--|
| Category: | Stormwater |
| Title: | Alum Springs Rd. Drainage Improvements |
| Status: | Updated |

Description: Installs new curb and gutter on both sides of Alum Springs Rd., from Borden Rd to Lime Kiln Rd; and on the east side of Lime Kiln Road from Alum Springs to McClungs. Provides for improvements to channel within existing drainage easement behind houses fronting on Lime Kiln Rd.

Justification: Residents on both sides of Alum Springs Rd. experience erosion damage to driveway entrances and lawn areas due to excessive runoff from storm events. All properties on the east side of Lime Kiln Rd. are well below the elevation of the roadway resulting in excessive runoff, erosion, and sedimentation to these properties. The City receives complaints and concerns from residents frequently. An asphalt berm was installed over the years, but this method is only a stopgap, temporary measure.

Strategic
Plan: Vision II: Goal IV: Maintain and update infrastructure and align fees with costs; Vision IV:
Goal IV: Provide and improve infrastructure

| Category: | Stormwater |
| Title: | Stormwater System Inventory and Capacity Analysis |
| Status: | New |

Description: Project will supplement and udate the 2014 Central Shenandoah Planning District Commission Lexinton drainage inventory to include the configuration, size, material and general condition of approximately one-thousand drainage structures, one-thousand stormwater pipes, and sixty-five stormwater culverts. The study will additionally provide a watershed delineation for up to one-hundred primary drainage outfalls and a capacity analysis of eighteen primary drainage trunk lines.

Justification: The City of Lexington is slowly, but surely, gaining on its water and sewer infrastructure needs. This project will assist the City in evaluating the condition and adeuacy of much of its stormwater system. This information will be used to evaluate future drainage infrastructure repair and replacement priorities.

| Requesting Department: | Public Works |
|------------------------|-----------------------------------|
| Category: Bridges | |
| Title: | Welch Park Rd. Bridge Replacement |
| Status: | No change |

Description:

Replace the Welch Park Road bridge over Sarah's Run in its entirety. This single barrel corrugated steel arch pipe culvert is nominally 23 feet long by 30 feet wide. This structure is approaching the end of its design service life. Its condition is deemed substandard given the section loss in the steel arch. This bridges continued integrity, safety and reliability are questionable in its present state. This structure will be replaced by a new concrete box culvert. It is anticipated that future VDOT funds will be acquired for the full cost of replacement.

Justification:

This structure is fifty-two (52) years old. The steel arch pipe exhibits severe corrosion and section loss in its crown and points of bearing on the abutments. The concrete abutments and wing walls show signs of cracking and undermining. This bridge was inspected by the City's structural consultant, Schwartz and Associates. It is their opinion that full replacement is warranted given its level of deterioration.

Strategic Plan:

Vision IV: Goal IV: Provide and improve infrastructure; Vision II: Goal IV: Maintain and update infrastructure and align fees with costs

| Requesting Department: | Public Works |
|---|---|
| Category: Streets, Parking, and Sidewalks | |
| Title: | North Main St. Entry Complete Street Entry Corridor |
| Status: | No change |

Description:

This project addresses multimodal improvements to N. Main Street from Jefferson Street to its juncture with the U.S. Route 11 Bypass. These improvements include eliminating all on-street parking; narrowing the roadway to allow for expansion of existing sidewalks and incorporation of new planting beds; installation of new ADA compliant curbing and walks; patching, milling, and repaving N. Main Street; installation of colored and textured crosswalks; and permanently delineating new bike lanes on both sides of the roadway. The City received 100% project funding in 2017. Project is estimated to go to construction in FY 22.

Justification:

N. Main Street serves as the City's northern gateway to its vibrant downtown area. N. Main Street is also part of the designated U.S. 76 Bike Route. Unfortunately agglomerated development, the overabundance of side street parking, and the mere age of the City's infrastructure throughout this corridor has led to numerous safety and mobility challenges. Pedestrian and driver safety are at odds with the limited site distances imposed by current on street parking and the lack of clearly defined cross-walks; project sidewalks are non-ADA compliant and riddled with obstructions; roadway pavements are fatigued and rutted; bicycle mobility is significantly impacted by lack of designated bike lanes, uneven pavements, and non-compliant drainage inlet grates; and the attractiveness of this significant entry corridor is diminished by the overabundance of hardscapes and lack of greenery.

Strategic Plan:

Vision I: Goal I: Increase accessibility for the disabled and continue efforts to achieve compliance with Americans with Disabilities Act; Vision I: Goal IV: Improve walk-ability and bike-ability for recreation and transportation; Vision IV: Goal III: Pro

| Title: | School Maintenance |
| Status: | No change |

| Description: | A systematic approach to maintain the expanded and renovated Lylburn Downing Middle School. This project will be completed over the next five (5) years with approximately 20% of the building painted each year. |
|--------------|---|
| | |

Justification: It has been eight(8) years since the completion of Lylburn Downing Middle School and areas of the building are in need of painting. Rather than waiting to paint the entire building at once it would be more effective to do a percentage of the building each year. This would allow for the repainting of the building every five (5) years.

|------------------------|--------------------------------------|
| Category: | Municipal Facilities |
| Title: | City Hall Renovations & Improvements |
| Status: | No change |

Description: Provides for total renovation and improvements to City Hall to include complete interior demolition; space study; total interior build-out; new mechanical, electrical, & plumbing; energy efficient windows; basement improvements for storage; site and drainage improvements; generator Installation; and office system furnishings. Complete interior demolition will provide for optimal space utilization and flexibility for organizational changes. The historic character of the exterior will be retained.

Justification: The existing building is over one-hundred years old and is in need of complete renovation and improvements to extend service life for another 50 years. The existing building is not energy efficient and space utilization is marginal. The aesthetic appearance of the building is poor for what is the City's flagship facility.

Strategic Vision IV: Goal IV: Provide and improve infrastructure
Plan:

| Estimated Annual Operating Cost: | Reduced from present due to greater energy efficienies. |

| Title: | Floyd S. Kay Renovation |
| Status: | New |

Description: Floyd S. Kay was built in 1975. The only upgrades to the building in 45 years have been an upgrade to the restrooms and the roof was recently replaced. The building is in need of a major renovation. An A&E study was recently completed. Recommendations from the study include upgrades to plumbing, lighting, ceiling replacement, and tile replacement. Renovating the building would also allow for new programs to be offered. The needs of our community have changed dramatically over the last 45 years. New programs and certifications currently in demand in our area include linemen, childcare, and emergency responders.

Justification: The current building is 45 years old. The physical building needs upgrades and space is needed for new courses to be offered.

| Title: | Diamond St. Bridge Repairs |
| Status: | Updated |

| Description: | Perform strategic repairs to the Diamond Street Bridge over Town Branch (Non NBI Structure). |
|--------------|---|
| | This bridge is of the double reinforced concrete box culvert design. This structure has been |
| | rated in "Satisfactory" condition, but repairs are recommended to maintain the bridge's |
| | structural integrity, safety and reliability. These repairs include patching all spalled and |
| | delaminated concrete throughout the structure, sealing construction joints, and rail replacement. |
| | |

| Justification: | This structure is of unknown age. Its concrete barrels and abutment wingwalls exhibit areas of cracking, spalling and delamination. Barrel joints are open and leaking. Bridge rails are broken and out of plumb. This bridge was inspected by the City's structural consultant, Schwartz and Associates. The repairs outlined herein are per their recommendation. |

| Requesting Department: | County Schools |
|------------------------|----------------|
| Category: | High School |
| Title: | Aux. Gym- RCHS |
| Status: | Updated |

Description:

At the present time Rockbridge County High School (RCHS) only has one gym. The school has approximately 1000 students and a second gym is needed. A second gym would enable multiple classes to have PE scheduled at the same time during the day. A second gym would also allow for multiple high school teams practice space as well as give community programs additional space to hold practices and games. An A&E study will be conducted in 2019. Using the recommendations from the study, a second gym would be constructed at RCHS.

Justification:

The construction of an auxiliary gymnasium would provide a needed space for practice facilities, as well as for RARO and community use.

Strategic Plan:

Vision III: Goal I: Provide access to K-12 education that is competitive with top-ranked schools in the broader region; Vision I: Goal II: Increase awareness and availability in adult recreational opportunities; Vision IV: Goal IV: Provide and improve inf

|------------------------|---|
| Category: | Bridges |
| Title: | Moses Mill Rd. (Mill Race) Bridge Repairs |
| Status: | Updated |

Description:

Perform strategic repairs to the North Main Street Bridge (Moses Mill Road) over the Mill Race. This single span concrete T-beam bridge is nominally 23 feet long by 27 feet wide. This structure has been rated in "FAIR" condition, but repairs are recommended to maintain the bridge's structural integrity, safety and reliability. These repairs include shotcreting/ patching all spalled and delaminated concrete throughout the structure; milling and repaving the asphalt wearing surface; epoxy coating the concrete deck surface; removing and replacing all railings; and upgrade of approach guardrails and terminals.

Justification:

This structure is eighty-six (86) years old. Its concrete decking exhibits areas of cracking and seepage. Concrete bridge abutments, bearing seats, and parapet walls display evidence of spalling, cracking, scaling and delamination. The bridge rail system is non-standard. The bridge deck wearing surface is potholed and delaminated. This bridge was inspected by the City's structural consultant, Schwartz and Associates. The repairs outlined herein are per their recommendation.

Strategic Plan:

Vision IV: Goal IV: Provide and improve infrastructure; Vision II: Goal IV: Maintain and update infrastructure and align fees with costs

| Category: | Bridges |
| Title: | Thornhill Rd. (Unnamed Tributary) Bridge Repairs |
| Status: | Updated |

Description:

Perform strategic repairs to the Thornhill Road Bridge over an unnamed tributary to Sarah's Run (Non NBI Structure). This bridge is of the single reinforced concrete slab span design. This structure has been rated in "Fair" condition, but repairs are recommended to maintain the bridge's structural integrity, safety and reliability. These repairs include milling and repaving wearing course asphalt pavement, epoxy coating the concrete bridge deck, patching parapet, abutment, wingwall and underside of deck concrete spalls, sealing construction joints, and upgrades to bridge guardrails, transitions and terminals.

Justification:

This structure is of unknown age. Its concrete slab span exhibits areas of cracking, delamination, scale and seepage. Concrete bridge abutments, breastwalls, wings and parapets display evidence of spalling, delamination, cracking and scale. This bridge was inspected by the City's structural consultant, Schwartz and Associates. The repairs outlined herein are per their recommendation.

Strategic Plan:

Vision IV: Goal IV: Provide and improve infrastructure; Vision II: Goal IV: Maintain and update infrastructure and align fees with costs

GF-147

| Requesting Department: | Public Works |
|------------------------|--|
| Category: | Streets, Parking, and Sidewalks |
| Title: | Lime Kiln & McLaughlin Intersection Improvements |
| Status: | Updated |

Description: This project improves pedestrian accomodations at the intersection of Lime Kiln Road and McLaughlin Street. Select trees within the City's right-of-way will be cleared to improve intersection visibility. Intersection turn radii will be widened and associated storm drainage infrastructure relocated and replaced to accomodate new ADA compliant ramps. Additionally, a new crosswalk will be installed crossing the entrance to Lime Kiln Road.

Justification: The existing intersection has poor visibility as one approaches Lime Kiln Road from the north on McLaughlin Street. Current storm drainage curb drop inlets are arranged such that ADA compliant ramps cannot be accomodated. The present intersection does not have a pedestrian crosswalk and is located in close proximity to the City's Wood's Creek park and Waddell Elementary School.

Strategic
Plan: Vision I: Goal I: Increase accessibility for the disabled and continue efforts to achieve compliance with Americans with Disabilities Act; Vision I: Goal IV: Improve walk-ability and bike-ability for recreation and transportation; Vision IV: Goal III: Pro

| Requesting Department: | Public Works |
|------------------------|--|
| Category: | Stormwater |
| Title: | Randolph/ Henry St. Stormwater Project |
| Status: | Updated |

| Description: | This project will replace approximately 250 linear feet of existing undersized corrugated metal | | | | | | |
|--------------|--|--|--|--|--|--|--|
| _ | arch culvert with a new 10' x 4' reinforced concrete box culvert in the vinity of the interction | | | | | | |
| | of Randolph Street and Henry Street. This culvert system conveys Town Branch stream flows | | | | | | |
| | and additionally serves as an interceptor for assorted City right-of-way stormsewer | | | | | | |
| | infrastructure. | | | | | | |
| | | | | | | | |

Justification: The existing corrugated arch culvert has surpassed its design life. In addition, the City's Town Branch Phase II Hydraulic Analysis identified this segement of culvert as inadequate to convey the 10-year storm event. This fact is borne out by the significant upsteam flooding witnessed on the east side of Randolph Street during periods of heavy rain. Public Works has recieved past requests for flood mitigation efforts from impacted homeowners.

Strategic
Plan:
Vision II: Goal IV: Maintain and update infrastructure and align fees with costs; Vision IV:
Goal IV: Provide and improve infrastructure

| Requesting Department: | County Schools |
|------------------------|---------------------------------------|
| Category: | High School |
| Title: | RCHS Concessions & Restrooms Facility |
| Status: | No change |

Description:

The high school needs a concession and restroom facility for the softball, tennis, and baseball fields. The building would be similar to the one used at the football field. The additional facility, or facilities, could be provided to support players and patrons at softball, tennis, and baseball events. An A&E study will be conducted in 2018-19. Using the recommendations from the study, a concession and restroom facility would be constructed at RCHS near the softball, baseball, and tennis areas.

Justification:

The construction of a concession and restroom facility near these athletic areas is highly needed for patron and community use. Lack of convenience and safety issues due to the proximity and crossing of Greenhouse Road to use facilities are of concern.

Strategic Plan:

Vision III: Goal I: Provide access to K-12 education that is competitive with top-ranked schools in the broader region; Vision IV: Goal IV: Provide and improve infrastructure

| Estimated Annual Operating Cost: | TBD |
|----------------------------------|----------|

GF-137

| Requesting Department: | County Schools |
|------------------------|-------------------------------------|
| Category: | High School |
| Title: | Football, Baseball, Tennis Lighting |
| Status: | No change |

Description:

Rockbridge County High School (RCHS) was opened in 1992. At the time the school opened only the football field was equipped with lights. Installing lights on the baseball field, softball field, and tennis courts will allow teams to schedule games and matches later into the evening. This allows for more flexibility in the schedule. Scheduling games later in the evening will allow students to finish their instructional day prior to preparing for games. Also, this would allow drivers coming to RCHS to complete their regular bus routes before driving the athletic trips. Often athletic schedules depend on the availability of bus drivers. Also, installing lights on the baseball and softball fields and tennis courts will allow RCHS to host district and regional tournaments. Due to the recently established performance contract with Trane, the lighting at RCHS, both interior and exterior, will be upgraded to high performance, energy bulbs. The lighting at the football field is not included in this contract. The lighting at the football field should also be upgraded to conserve energy and be cost efficient.

Justification:

Installing lights on the baseball field, softball field, and tennis courts will allow teams to schedule games and matches in the evening. This allows for more flexibility in the schedule. The new lights would be high performance, energy efficient bulbs in all areas.

Strategic Plan:

Vision III: Goal I: Provide access to K-12 education that is competitive with top-ranked schools in the broader region; Vision IV: Goal IV: Provide and improve infrastructure

Estimated Annual Operating Cost: TBD

|------------------------|---------------------------------|
| Category: | High School |
| Title: | Paving Junior Parking Lot- RCHS |
| Status: | No change |

Description:

Rockbridge County High School opened in 1992. All surfaces around the high school were paved with the exception of the junior parking lot. The junior parking lot is an area used on a daily basis by students, parents, and community members. The junior parking lot is used for student parking during the school day, used for parking during athletic events, used by the community for various events, and used to park school buses during the summer. Each year the junior lot must have additional loads of gravel to repair pot holes. During the winter months, most of the gravel is lost when the lot is plowed. We recently were able to apply a tar/gravel mixture on this lot. This helps, but is a temporary solution. Paving this lot would benefit students, parents, and community members alike.

Justification:

Current surface is tar/gravel. During snow removal, this temporary product is plowed away. Each year, the school system must haul several loads of gravel to resurface the lot and fill pot holes. Paving this lot would improve student parking, athletic parking, and provide a paved surface for community use.

Strategic Plan:

Vision III: Goal I: Provide access to K-12 education that is competitive with top-ranked schools in the broader region; Vision IV: Goal IV: Provide and improve infrastructure

| Requesting Department: | Fire |
|------------------------|-----------------------|
| Category: | Fire Department |
| Title: | eDraulic Rescue Tools |
| Status: | New |

| Description: | New technology has developed battery-operated hydraulic rescue tools (Jaws of Life) that are used to extricate victims from vehicle accidents. These new tools do not require hoses connected to vehicle-mounted hydraulic pumps like our current technology. |
|--------------|---|
| | |

Justification: Hydraulic hoses normally limit our distance from the fire apparatus to the victim of 100'. Battery-operated tools are lighter in weight and have no distance limitations. Modern battery technology has given them the same strength as hose fed tools. This provides the rescuers with quicker and easier cut times to remove the vitcims entangled in a vehicle accident.

|------------------------|-----------------------------|
| Category: | Bridges |
| Title: | Route 11 Bridge Replacement |
| Status: | No change |

Description:

Replace the Route 11 (Business) bridge over Route 11 (By-pass) in its entirety. This three span, steel beam bridge is nominally 141 feet long by 30 feet wide. Strategic bridge repairs were performed in 2014, adding a modicum of years to its service life. VDOT funds have been previously secured for work at this location, and may be applied to bridge repair efforts; however, they must be tied to one of VDOT's funding programs. It is anticipated that future VDOT funds will be acquired for the full cost of replacement. This structure serves as a vital corridor to the City and has exceeded its design service life. In the event of failure, the safety and socioeconomic impacts to the community would be innumerable.

Justification:

This structure is over sixty (60) years old. Its concrete deck slabs are cracked and exhibit significant amounts of seepage. Primary steel support beams and diaphragms are severely corroded and have sustained extensive section loss. This bridge was inspected by the City's structural consultant, Schwartz and Associates. It is their opinion that full replacement is warranted given its level of deterioration.

Strategic Plan:

Vision IV: Goal IV: Provide and improve infrastructure; Vision II: Goal IV: Maintain and update infrastructure and align fees with costs

| Category: | Bridges |
| Title: | Rebel Ridge Rd. Bridge Repairs |
| Status: | Updated |

Description:

Perform strategic repairs to the Rebel Ridge Road Bridge over Woods Creek (Non NBI Structure). This bridge is of the double reinforced concrete box culvert design. This structure has been rated in "Satisfactory" condition, but repairs are recommended to maintain the bridge's structural integrity, safety and reliability. These repairs include patching all spalled and delaminated concrete throughout the structure; remediation of outlet undermining and embankment erosion; and upgrades to guardrails and terminals.

Justification:

This structure is of unknown age. Its concrete barrels and abutment wingwalls exhibit areas of cracking, spalling and delamination. The culvert outlet is undermined and the upstream embankments are experiencing erosion. Bridge timber rails are spilt and checked. This bridge was inspected by the City's structural consultant, Schwartz and Associates. The repairs outlined herein are per their recommendation.

Strategic Plan:

Vision IV: Goal IV: Provide and improve infrastructure; Vision II: Goal IV: Maintain and update infrastructure and align fees with costs

| Category: | Bridges |
| Title: | Route 60 (Woods Creek) Bridge Replacement |
| Status: | No change |

Description:

Replace the Route 60 bridge over Woods Creek in its entirety. This three span, concrete T-beam bridge is nominally 156 feet long by 34 feet wide. This structure serves as a vital corridor to the City and has exceeded its design service life. In the event of failure, the safety and socioeconomic impacts felt by the community would be innumerable. It is anticipated that future VDOT funds will be acquired for the full cost of replacement.

Justification:

This structure is eighty-seven (87) years old. Its concrete deck slabs are cracked and exhibit significant amounts of seepage. Primary concrete support beams and girders are severely cracked, spalled and delaminated with numerous areas of exposed reinforcing steel and loss of bearing at the abutment seats. Bridge abutments and piers show similar levels of distress. This bridge was inspected by the City's structural consultant, Schwartz and Associates. It is their opinion that full replacement is warranted given its level of deterioration.

Strategic Plan:

| Category: | Bridges |
| Title: | Route 60 (Woods Creek) Bridge Repair |
| Status: | Updated |

Description: This project is offered as an interim measure to postpone the extreme expense of a full bridge replacement. This project includes epoxy spall and shotcrete repairs thoughout the bridge's substructure and superstructure, including rail system, in a effort to mitigate further concrete delamination and corresion of the bridges reinforcing steel. These efforts are estimated to extend the bridge's design life an additional 15 to 20 years.

Justification: This structure is over eighty-seven (87) years old. The bridge deck slab, concrete support beams and girders, piers, footings, and abutments exhibit signs of significant contrete cracking, spalling, and delamination. This issue is exacerbated by the location of the Woods Creek Trail below. Falling concrete debris pose a significant risk to trail users.

Strategic Plan: Vision IV: Goal IV: Provide and improve infrastructure; Vision II: Goal IV: Maintain and update infrastructure and align fees with costs

| Category: | Bridges |
| Title: | Thornhill Rd. (Sarah's Run) Bridge Repairs |
| Status: | Updated |

Description:

Perform strategic repairs to the Thornhill Road Bridge over Sarah's Run (Non NBI Structure). This bridge is of the single reinforced concrete slab span design. This structure has been rated in "Satisfactory" condition, but repairs are recommended to maintain the bridge's structural integrity, safety and reliability. These repairs include milling and repaving wearing course asphalt pavement, epoxy coating the concrete bridge deck, patching parapet and underside of deck concrete spalls, pressure injection of construction joints, upgrades to bridge guardrails, transitions and terminals.

Justification:

This structure is of unknown age. Its concrete slab span exhibits areas of cracking, delamination, scale and seepage. Concrete bridge abutment breastwalls and wings display evidence of cracking and scale. This bridge was inspected by the City's structural consultant, Schwartz and Associates. The repairs outlined herein are per their recommendation.

Strategic Plan:

Vision IV: Goal IV: Provide and improve infrastructure; Vision II: Goal IV: Maintain and update infrastructure and align fees with costs

| Requesting Department: | Public Works |
|------------------------|--------------------------------|
| Category: | Streets Parking, and Sidewalks |
| Title: | McCrum's Parking Lot |
| Status: | No change |

Description:

Remove and replace the entire parking lot pavement section. The new pavement section shall consist of 8" #21A aggregate base, 2.5" BM-25 binder asphalt, and 1.5" SM-9.5 surface asphalt. Replace all perimeter and island concrete curb. Replace two concrete entrances. Remove landscaped finger islands. Landscaping will be relocated to more suitable center islands. Finger island removal will increase lot capacity. Center island brick pavers will be removed. Only select areas will be reinstalled for pedestrian access. Aged parking lot lighting will be replaced.

Justification:

The lot's pavement section has surpassed its designed service life. Numerous locations exhibit signs of subgrade failure, pavement oxidation, and pavement cracking. Lot has deteriorated to a level where seal coating and surface overlays are no longer viable maintenance options. The lot's concrete infrastructure is chipped, spalled and cracked and is no longer structurally sufficient. The existing finger islands have proven inadequate for sustaining landscape materials. The existing lights are aged and rusted, no longer conveying the aesthetics of a vibrant downtown area.

Strategic Plan:

Vision IV: Goal IV: Provide and improve infrastructure; Vision II: Goal IV: Maintain and update infrastructure and align fees with costs; Vision IV: Goal III: Provide and improve pedestrian and bike accommodation and awareness

| Requesting Department: | Public Works |
|------------------------|--------------------------------|
| Category: | Streets Parking, and Sidewalks |
| Title: | Estill St. Improvements |
| Status: | No change |

Description:

Remove and replace the entire Estill Street pavement section from E. Nelson Street to E. Washington Street. Project includes straightening the road alignment, the provision of additional parallel parking on the east side of the street, and a new concrete sidewalk on the west side of the street. The new pavement section shall consist of 8" #21A aggregate base, 4" BM-25 binder asphalt, and 2" SM-9.5 surface asphalt.

Justification:

The asphalt pavement in this work zone has surpassed its designed service life. Numerous locations along Estill Street exhibit signs of subgrade failure, pavement oxidation, and pavement cracking. The roadway is poorly aligned. Current edge of road parking limits adequate two-way traffic flow. Presently there are no sidewalks extending the length of the work zone to accommodate pedestrian traffic.

Strategic Plan:

Vision IV: Goal IV: Provide and improve infrastructure; Vision II: Goal IV: Maintain and update infrastructure and align fees with costs; Vision IV: Goal III: Provide and improve pedestrian and bike accommodation and awareness

GF-105

| Requesting Department: | Public Works |
|------------------------|--|
| Category: | Municipal Facilities |
| Title: | Replace Piovano Building Emergency Generator |
| Status: | No change |

| Description: | Project replaces an outmoded 15 KW emergency generator at the Piovano Building. Also |
|--------------|---|
| | installs a new automatic transfer switch. The existing generator is sized to furnish emergency power to limited lighting and a few other circuits to facilitate egress in the event of commercial |
| | power loss. |
| | |
| | |

Justification: The existing generator was installed when the building was constructed in 1979 and is no longer parts supportable. It does still run and can be used in event of an emergency. However, its reliability is questionable owing to its years in service and in the event of a component failure will not be repairable.

| Category: | Stormwater |
| Title: | Enfield Road Drainage Improvements – Phase 1 |
| Status: | No change |

Description:

This project provides for the construction of 875 linear feet of sidewalk and curb & gutter on the north side of Enfield Road and approximately 550 linear feet of curb & gutter on the south side of Enfield Road nominally from Battery Lane to Confederate Circle. Project additionally includes a new stormsewer system, which will outfall adjacent to Pickett Street, and new driveway entrances throughout the work area. A pedestrian crossing with traffic calming measures will be constructed in the vicinity of Enfield Road and Confederate Circle.

Justification:

Stormwater runoff from Enfield Road enters ajoining properties generating erosion and vehicle access issues. The proposed sidewalk will greatly enhance pedestian safety and walkability along this segment of Enfield Road..

Strategic Plan:

Vision II: Goal IV: Maintain and update infrastructure and align fees with costs; Vision IV: Goal IV: Provide and improve infrastructure

Estimated Annual Operating Cost: n/a

Work Performed: | Contract

| Requesting Department: | Public Works |
|------------------------|---|
| Category: Stormwater | |
| Title: | Lime Kiln and McLauglin Pedestrian/ Drainage Improvements |
| Status: | New |

Description:

Project will attempt to intercept the "ephemeral" spring water that has plagued the referenced intersection and discharge this water into the public storm sewer. This project additionally provides for greater pedestrian safety to those traversing the McLaughlin Street blind curve from the existing Myers Street sidewalk terminus.. Project will include two grated drop inlets, forty linear feet of concrete valley gutter, and approximately one-hundred and eighty linear feet of twelve inch storm sewer to manage surface flows. Project additionally includes handicap ramps and a pedestrian cross walk at the McLaughlin Street terminus of Myers Street and a new 4' wide concrete sidewalk on the east side of McLaughlin Street, from Myers Street to W. Nelson Street. A budget allowance has been made for minor utility relocations.

Justification:

The referenced intersection has been plagued by periodic spring discharges. This condition has proven problematic during ice and snow events. In addition, numerous pedestrians traverse the McLaughlin Street blind curve daily when exiting the Myers Street sidewalk terminus.

Strategic Plan:

Vision II: Goal IV: Maintain and update infrastructure and align fees with costs; Vision IV: Goal IV: Provide and improve infrastructure

Estimated Annual Operating Cost:

| Requesting Department: | Public Works |
|------------------------|--|
| Category: | Water & Wastewater |
| Title: | Diamondhill Area Water/Sewer System Improvements-Phase 1 |
| Status: | Revised |

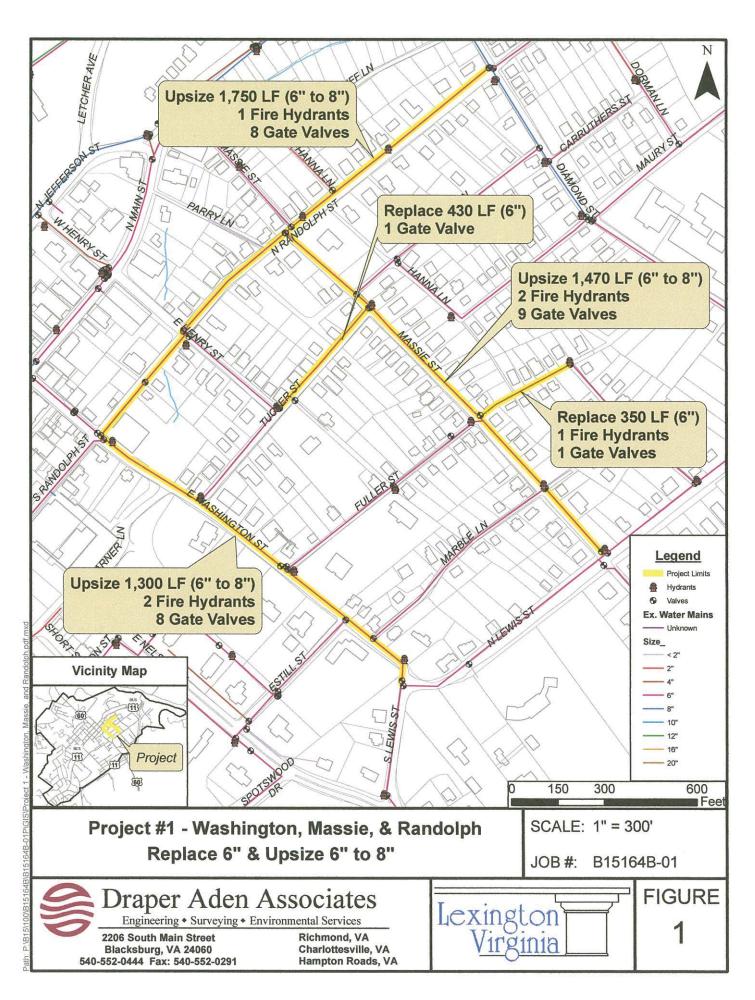

| Description: | Project upsizes approximately 4,520 LF of 6-inch cast iron pip to 8-inch ductile iron (DI) pipe |
|--------------|---|
| | and replaces 780 LF of 6-inch cast iron pipe with new 6" DI pipe. The project also replaces |
| | approximately 5,450 linear feet of existing gravity sewer pipe and associated laterals. This |
| | project combines the former Washington, Massie, and Randolph Street Water Projects with |
| | the Ruff Lane, N. Randolph & Parry Lane, Tucker St., Massie St., and E. Washington St. |
| | Sewer Projects. |
| | |
| | |

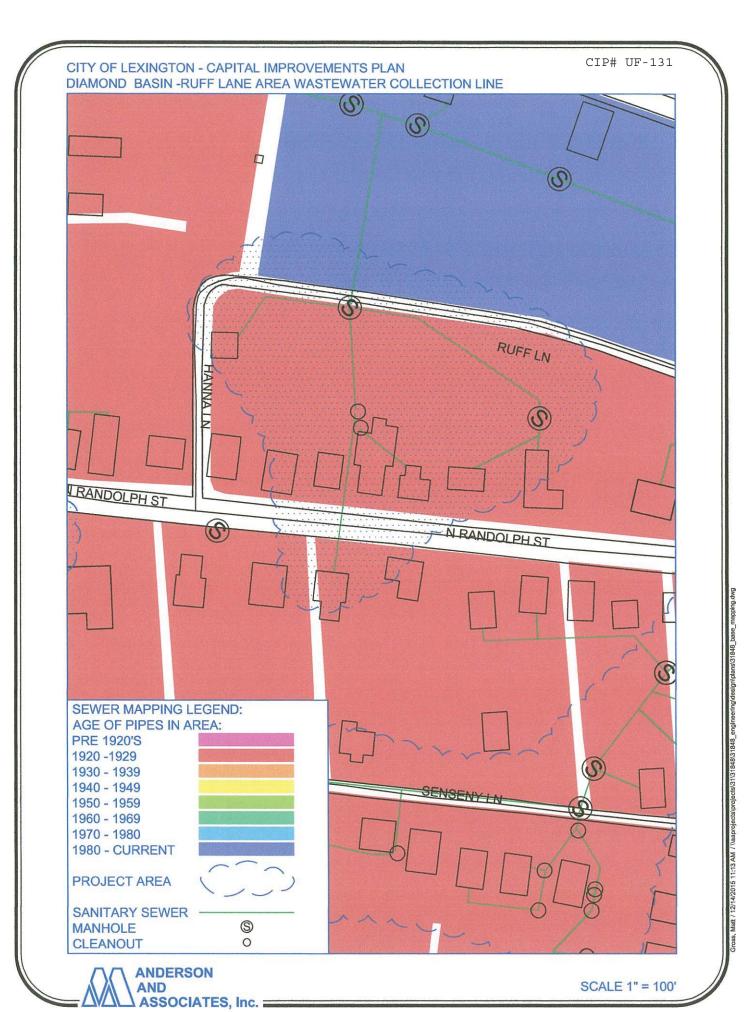

Justification: The pipes in this section are beyond their designed life cycle use as they are approximately 81 years old, potentially resulting in poor water quality and high exfiltration in joints. This project has a high impact of deferral based on the age of the pipe and the potential for failure resulting in increased risk to health and safety of the community. The existing collection lines were constructed in the 1920s, and the area has a history of I&I problems.

Strategic
Plan: Vision IV: Goal IV: Provide and improve infrastructure; Vision II: Goal IV: Maintain and update infrastructure and align fees with costs

UF-171

| Requesting Department: | Public Works |
|------------------------|--|
| Category: | Water & Wastewater |
| Title: | Jackson Area Water/Sewer System Improvements-Phase 1 |
| Status: | Revised |

Description:

Project geographic area is nominally bounded by Jefferson Street, White Street, Myers Street, and W. Nelson Street. This project absorbs, and supplements, water projects UF-9 (Jackson & Lee) and UF-19 (Barclay Drive). This project absorbs, and supplements, wastewater projects UF-73 (White Area), UF-75 (McDowell Area), and UF-77 (Myers Area). With the exception of the 1980's 12" Jackson/ Lee waterline, all publically owned water infrastructure is scheduled to be replaced. Similarly, all public wastewater infrastructure shall be replace, or lined, as conditions dictate. Project budget was re-evaluated in FY21 to assume the majority of the wasterwater infrastructure in this geographic area is unlineable.

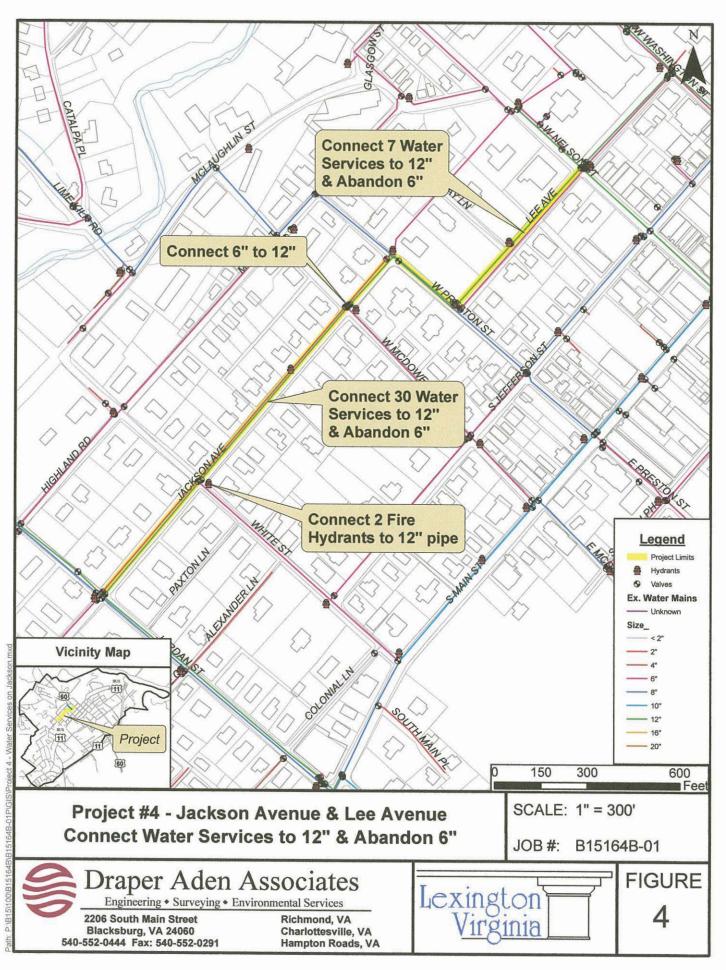

Justification:

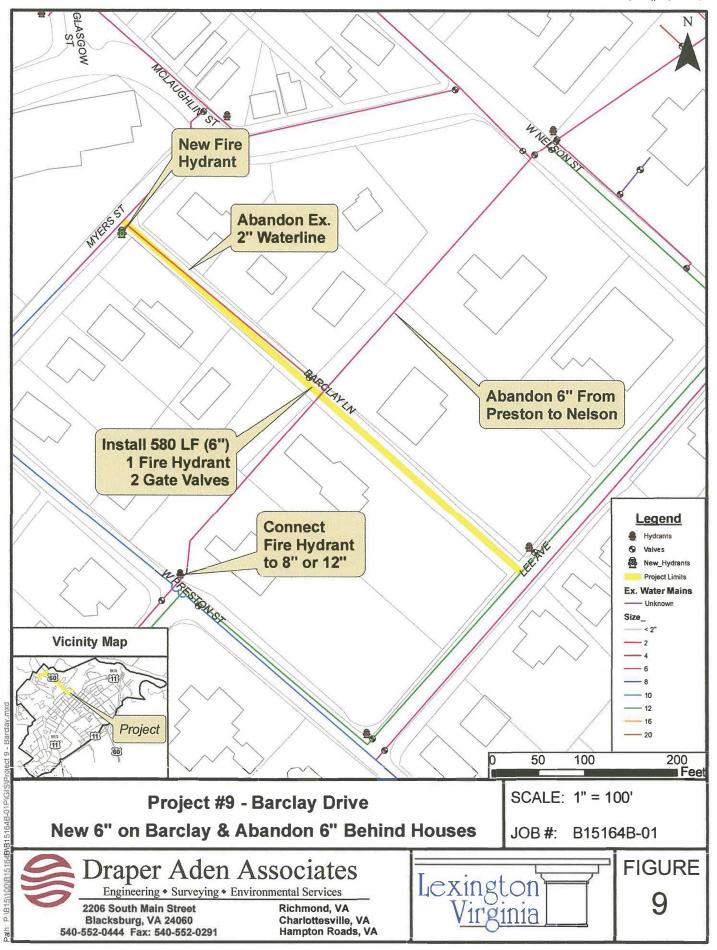

Project was developed to align water and wastewater replacement initiatives in this portion of the Jackson neighborhood. Original 2015 Water Distribution System CIP projects did not prioritize these lines due to indeterminate aging data. Project intended to replace waterlines concurrently with wastewater improvements that have been prioritized in this area; thereby, enabling the City to program roadway resurfacing improvements at an earlier time and reducing overall customer inconvenience.

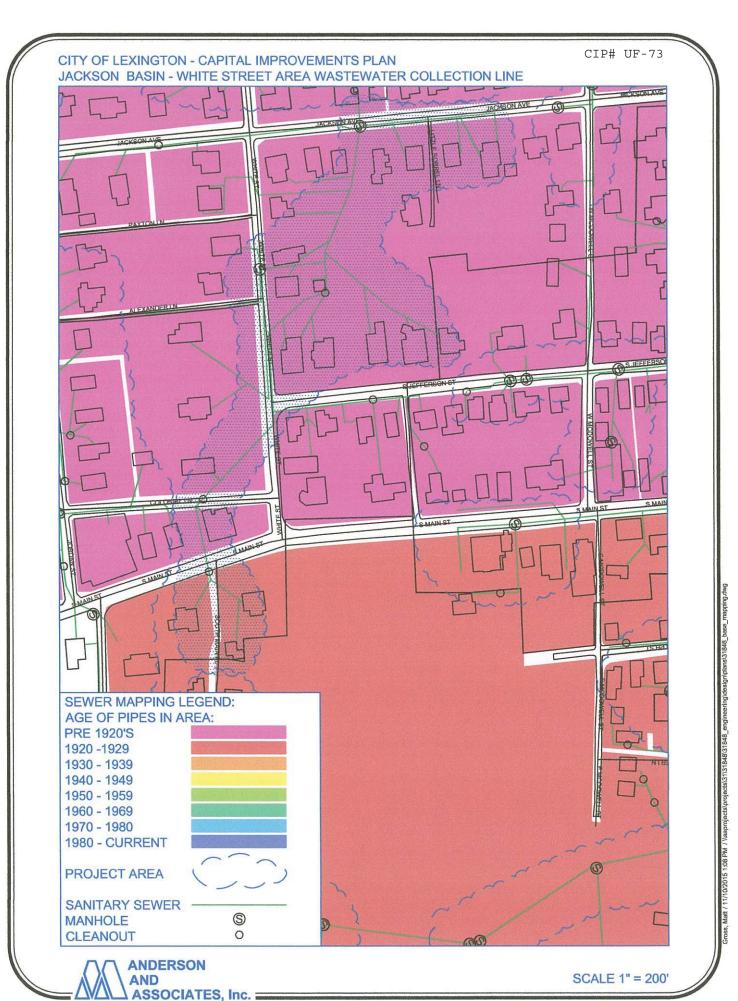

Strategic Plan:

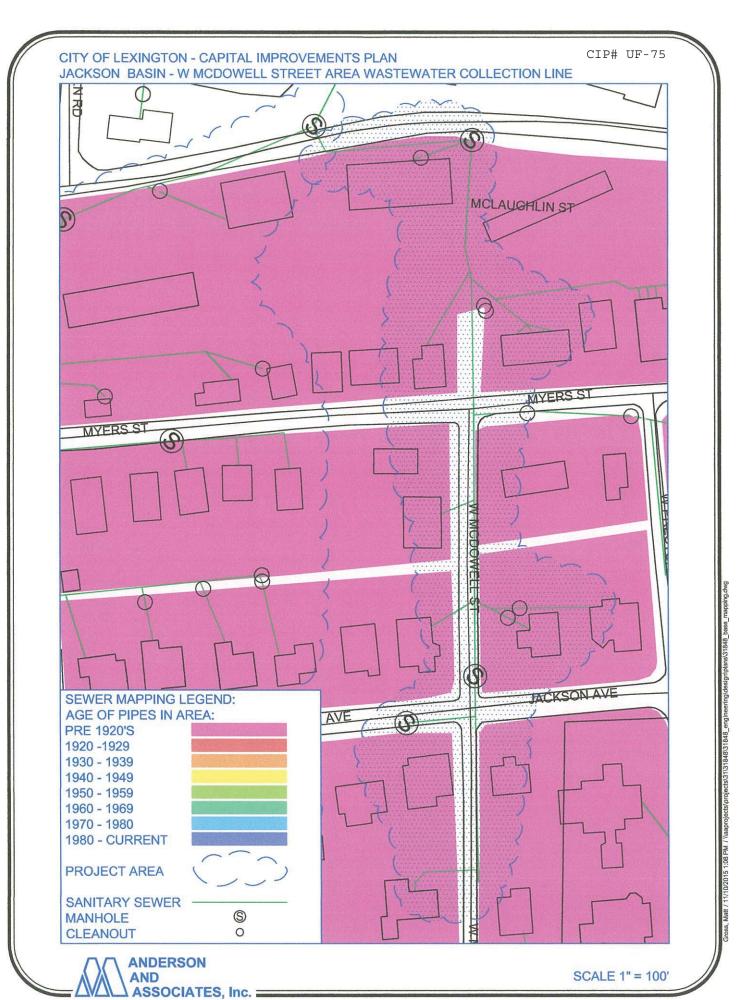

| Estimated Annual Operating Cost: | N/A |

UF-169

| Requesting Department: | Public Works |
|------------------------|--|
| Category: | Wastewater |
| Title: | Infiltration & Inflow Reduction Projects |
| Status: | Revised |

| Description: | This project provides funds for investigation, analysis, engineering, and rehabilitation of wastewater lines where extensive infiltration or inflow (I & I) is identified. The highest priority |
|--------------|---|
| | for identified projects will be the elimination of direct inflow. For certain work, opportunity exists to leverage city utility funds through the Maury Service Authority I & I Revenue Sharing |
| | Program, which provides a match of 75% for eligible projects. |

| Justification: | Infiltration and inflow must be reduced from the City's wastewater collection system to |
|----------------|--|
| | maximize capacity for customers; prevent overflows; reduce city purchased wastewater |
| | treatment costs; and to facilitate wastewater treatment plant operation within permitted limits. |
| | |
| | |

| Title: | Jackson Area Water/Sewer System Improvements-Phase 2 |
| Status: | Revised |

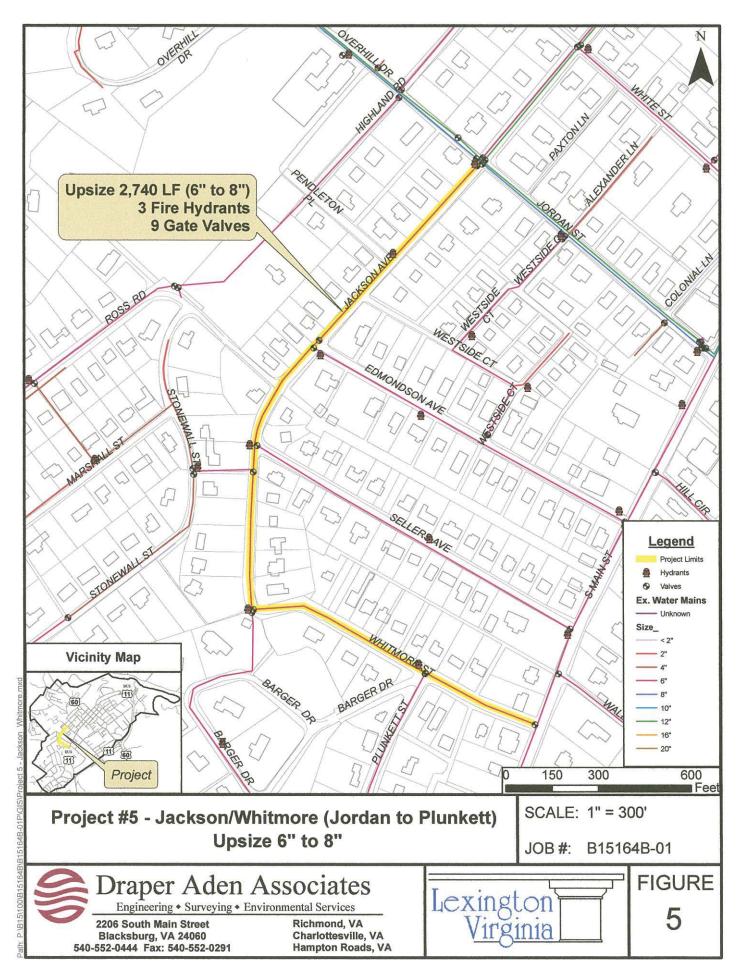

| Description: | Project geographic area is nominally bounded by S. Main Street, Whitmore Avenue, Highland |
|--------------|---|
| | Street, and White Street. This project absorbs, and supplements, water projects UF-11 (Jackson |
| | & Whitmore), UF-13 (Sellers, Edmondson, and Westside Court), and a portion of UF-29 (New |
| | Watermain - Jordan to EFPS). This project absorbs, and supplements, wastewater projects UF- |
| | 79 (Highland Road Area) and UF-85 (Central Jackson Wastewater). All publically owned |
| | water infrastructure is scheduled to be replaced. Similarly, all public wastewater infrastructure |
| | shall be replace, or lined, as conditions dictate. Project budget was re-evaluated in FY21 to |
| | assume the majority of the wasterwater infrastructure in this geographic area is unlineable. |

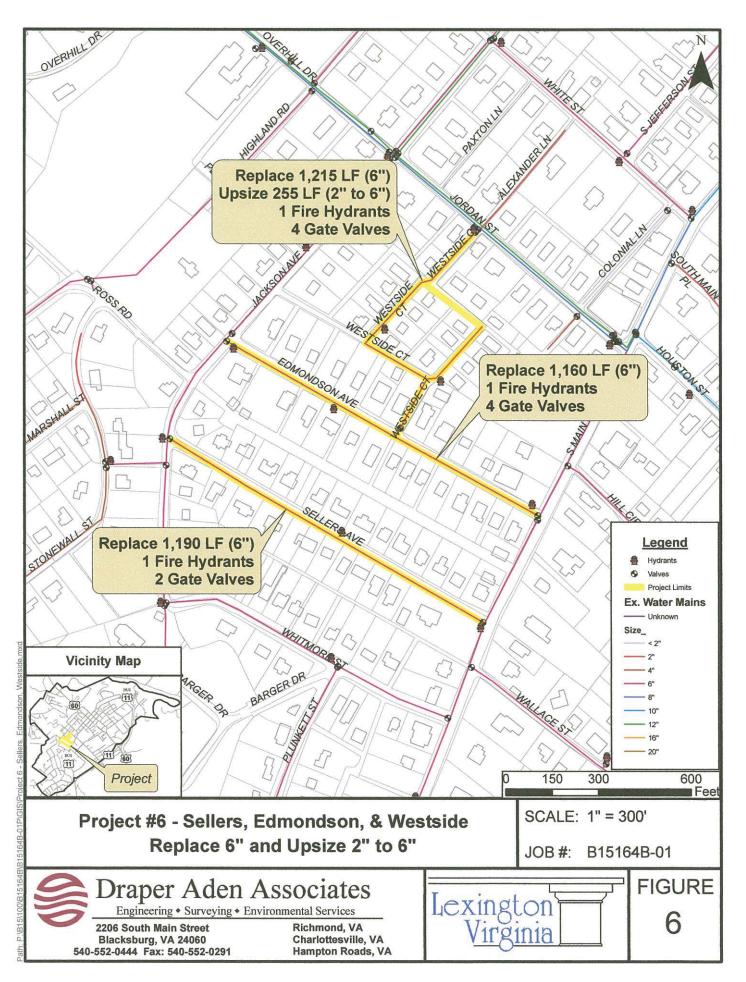

| Justification: | Project was developed to align water and wastewater replacement initiatives in this portion of |
|----------------|--|
| | the Jackson neighborhood. Original 2015 Water Distribution System CIP projects did not |
| | prioritize these lines due to indeterminate aging data. Project intended to replace waterlines |
| | concurrently with wastewater improvements that have been prioritized in this area; thereby, |
| | enabling the City to program roadway resurfacing improvements at an earlier time and reducing |
| | overall customer inconvenience. |

| Title: | Diamond Hill Area Water/ Sewer System, Improvements-Phase II |
| Status: | Revised |

Description: Project geographic area is nominally bounded by Diamond Street, N. Main Street, By-Pass Route 11, E. Nelson Street, and Lewis Street. This project absorbs, and supplements, water projects UF-23 (Caruruthers & Dorman), UF-43 (Hood & Graham Lane), and UF-57 (Diamond, Maury, Smith and Lewis Street Loop). This project absorbs, and supplements, wastewater projects UF-97 (Graham & Hook Lane), UF-103 (Morningside & Donald Street), and UF105 (E. Nelson Street. All publically owned water infrastructure dated prior to 2000 isscheduled to be replaced. Project additionally accounts for two bored water crossings of By-Pass Route 11 to provide greater system connectivity with the McCorkle system. Similarly, all public wastewater infrastructure shall be replace, or lined, as conditions dictate.

Justification: Project was developed to align water and wastewater replacement initiatives in this portion of the Diamond Hill neighborhood. Original 2015 Water Distribution System CIP projects did not prioritize these lines due to indeterminate aging data. Project intended to replace waterlines concurrently with wastewater improvements that have been prioritized in this area; thereby, enabling the City to program roadway resurfacing improvements at an earlier time and reducing overall customer inconvenience.

| Requesting Department: | Public Works |
|------------------------|--|
| Category: | Water |
| Title: | Stonewall Street & Marshall Street Water System Upgrades |
| Status: | No Change |

Description:

Project upsizes approximately 3,530 LF of 2- and 4-inch galvanized steel pipe to 6- and 8-inch ductile iron (DI) pipe, including 410 LF of new 8-inch DI pipe and the abandonment of the existing 2-, 4- and 6-inch cast iron pipes. Stonewall St. from the 600 block valve to Ross Rd. will be replaced with 1,260 LF of 6-inch DI pipe, 1 fire hydrant, 2 gate valves and approximately 17 service connections. The entire length of Marshall St. will be replaced with 760 LF of 6-inch DI pipe, 1 fire hydrant, 2 gate valves and approximately 17 service connections. The existing 6-inch cast iron pipe connecting Stonewall St. and Jackson Ave. will be abandoned in place and the two service connections relocated to the adjacent new 6-inch DI pipe on Stonewall St. A new 410 LF 8-inch DI pipe will connect Stonewall St. to Jackson Ave along Ross Rd. Ross Rd. from the City line to Stonewall St. will be replaced with 1,180 LF of 8-inch DI pipe including 1 fire hydrant, 4 gate vales and approximately 14 service connections. The 4-inch pipe connecting Ross Rd. to the center of Marshall St. will be replaced with 330 LF of 6-inch DI pipe including 2 gate valves.

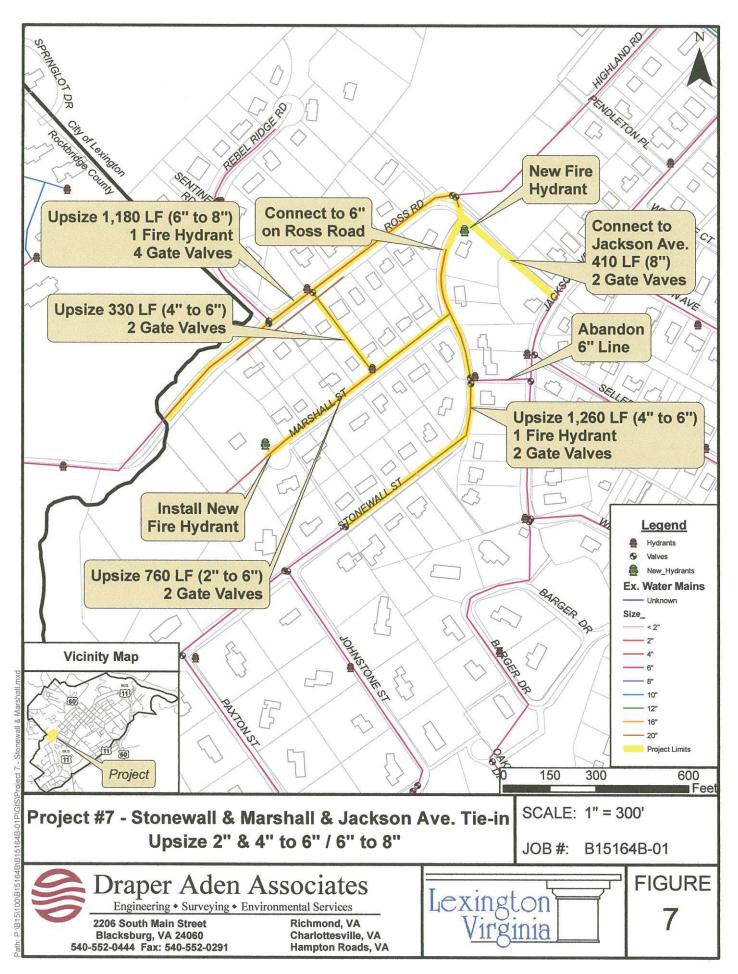

Justification:

The pipes in this section are beyond their designed life cycle use as they are approximately 92 years old potentially resulting in poor water quality and high exfiltration in joints. This project has a high impact of deferral based on the age of the pipe and the potential for failure resulting in increased risk to health and safety of the community.

Strategic Plan:

| Title: | E. Preston Street & Varner Lane Water System Upgrades |
| Status: | No Change |

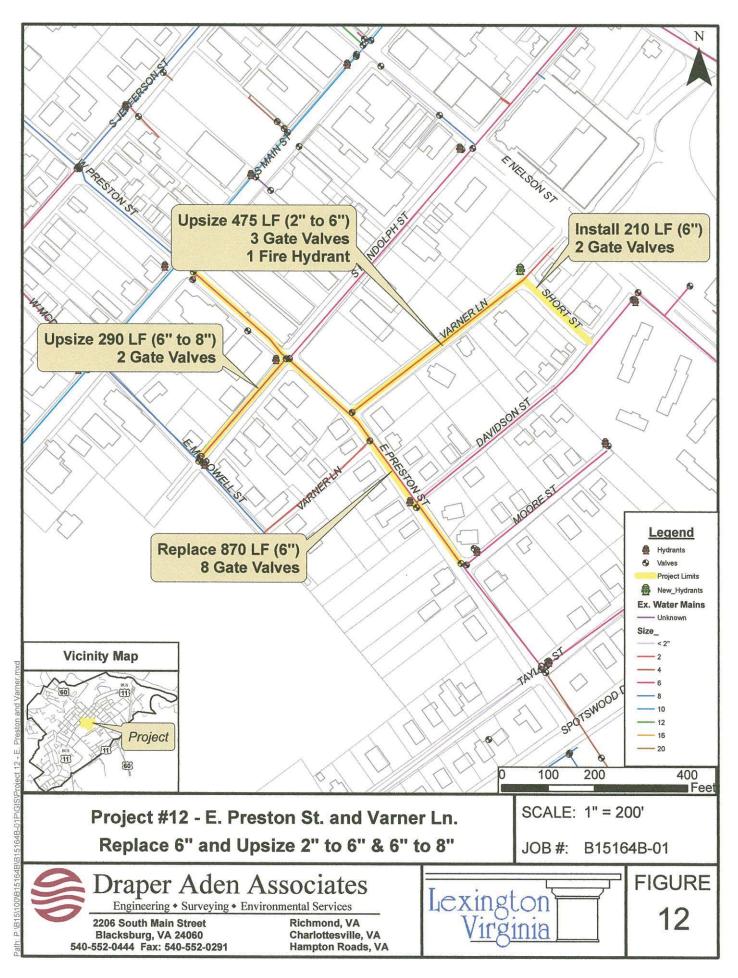

Description: Project includes 1,555 LF of 6-inch ductile iron (DI) pipe and 290 LF of 8-inch DI pipe. E. Preston St. from Moore St. to Main St. includes replacement of 870 LF of 6-inch DI pipe, 8 gate valves and approximately 14 service connections. Varner and Short St. includes upsizing 475 LF of 2-inch pipe to 6-inch DI pipe and 210 LF of new 6-inch DI pipe creating a loop for fire flow capacity, 5 gate valves, 1 new fire hydrant and approximately 4 service connections. S. Randolph from McDowell St. to Preston St. includes upsizing 290 LF of 6-inch cast iron pipe to 8-inch DI pipe and 2 gate valves.

Justification: The pipes in this section are beyond their designed life cycle use as they are approximately 85 years old potentially resulting in poor water quality and high exfiltration in joints. This project has a high impact of deferral based on the age of the pipe and the potential for failure resulting in increased risk to health and safety of the community.

| Title: | New Water Main- Jordan Street to Enfield Pump Station |
| Status: | No Change |

Description:

Project includes replacing 5,100 LF of 12-inch cast iron pipe to 12-inch ductile iron (DI) pipe and abandonment of 8-inch cast iron pipe. This alignment is from Enfield pump station to Pickett St. then traverses cross country to Overhill Dr. and along Jordan St. to S Main St. This line includes 5,100 LF of 12-inch DI pipe, 13 gate valves, 2 fire hydrants, moving a 2" connection from 8-inch pipe to 12-inch pipe and approximately 10 service connections. During FY21 CIP development, the 1,000 linear foot portion of the 12" Jordan Street waterline from Main Street to Jackson Avenue was included in the Jackson Phase 2 project. Remaining portions of the project as described herein were deferred.

Justification:

The pipes in this section are beyond their designed life cycle use as they are approximately 92 years old potentially resulting in poor water quality and high exfiltration in joints. This project has a high impact of deferral based on the age of the pipe and the potential for failure resulting in increased risk to health and safety of the community. This project will decrease maintenance liability and will be easier to access if needed and will provide higher fire flow potential to the local school.

Strategic Plan:

UF-31

| Requesting Department: | Public Works |
|------------------------|---------------------------------|
| Category: | Water |
| Title: | Bell Road Water System Upgrades |
| Status: | No Change |

Description:

Project includes upsizing 2,960 LF of 4-inch cast iron pipe to 6-inch ductile iron (DI) pipe and replacing 260 LF of 2-inch cast iron pipe. This alignment is the entire length of Bell Rd. and W. Midland Trail from Bell Rd. to the end of service fire hydrant. This alignment includes 2,950 LF of 6-inch DI pipe, 2 gate valves, 1 fire hydrant and approximately 5 service connections. An additional 260 LF of 2-inch cast iron pipe along Keydet Ln. will be replaced with 2-inch DI pipe, 1 gate valve and 1 service connection.

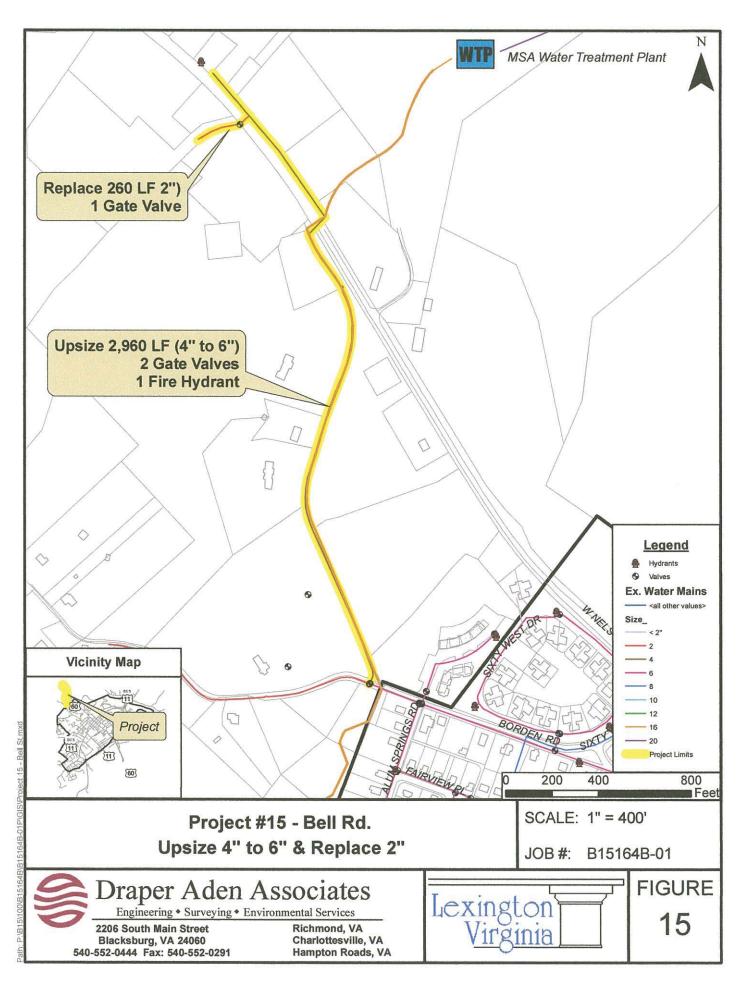

Justification:

The pipes in this section are beyond their designed life cycle use as they are approximately 55 years old potentially resulting in poor water quality and high exfiltration in joints. This project has a high impact of deferral based on the age of the pipe and the potential for failure resulting in increased risk to health and safety of the community.

| Title: | Center Street & Summit Street Water System Upgrades |
| Status: | No Change |

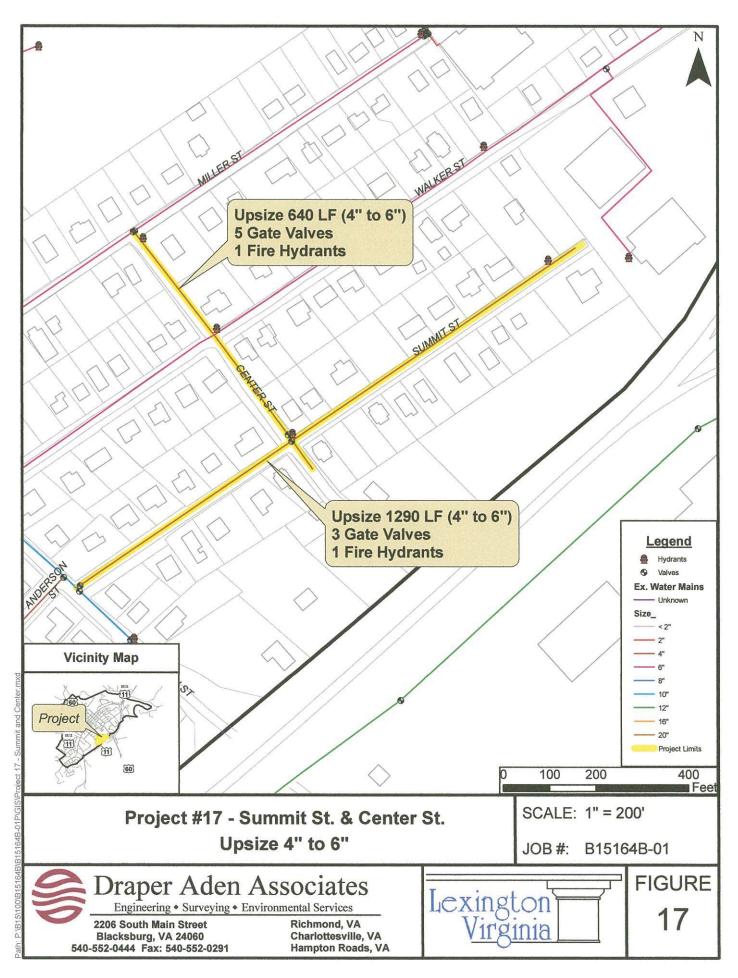

| entire length of Center St. will be upsized including 640 LF of 6-inch DI pipe, 5 gate valves, 1 fire hydrant and approximately 10 service connections. This entire length of Summit St. and a connection to the adjacent pipe will be upsized including 1,290 LF of 6-inch DI pipe, 3 gate valves, 1 fire hydrant and approximately 10 service connections. |
|--|
| connection to the adjacent pipe will be upsized including 1,290 LF of 6-inch DI |

| Justification: | This project will offer increased fire flow to the local residences. The pipes in this section are |
|----------------|--|
| | approximately 50 years old. This project has public safety implications as it provides protection |
| | during a fire event. |
| | |
| | |

| Strategic | Vision IV: Goal IV: Provide and improve infrastructure; Vision II: Goal IV: Maintain and |

| Title: | Maple Lane Water System Upgrades |
| Status: | No Change |

| e | Project includes upsizing 1,730 LF of 4-inch cast iron pipe to 6-inch ductile iron (DI) pipe. The entire length of Maple Ln. and across to Waddell St. will be upsized including 1,730 LF of 6-inch DI pipe, 5 gate valves, 1 fire hydrants and approximately 23 service connections. |
|---|---|
| | men Di pipe, 3 gate varves, i fire nyurants and approximately 23 service connections. |

Justification: This project will offer increased fire flow to the local residences. The pipes in this section are beyond their designed life cycle use as they are approximately 64 years old potentially resulting in poor water quality and high exfiltration in joints. This project has a high impact of deferral based on the age of the pipe and the potential for failure resulting in increased risk to health and safety of the community.

| Title: | Stono Lane & N. Main Street Water System Upgrades |
| Status: | No Change |

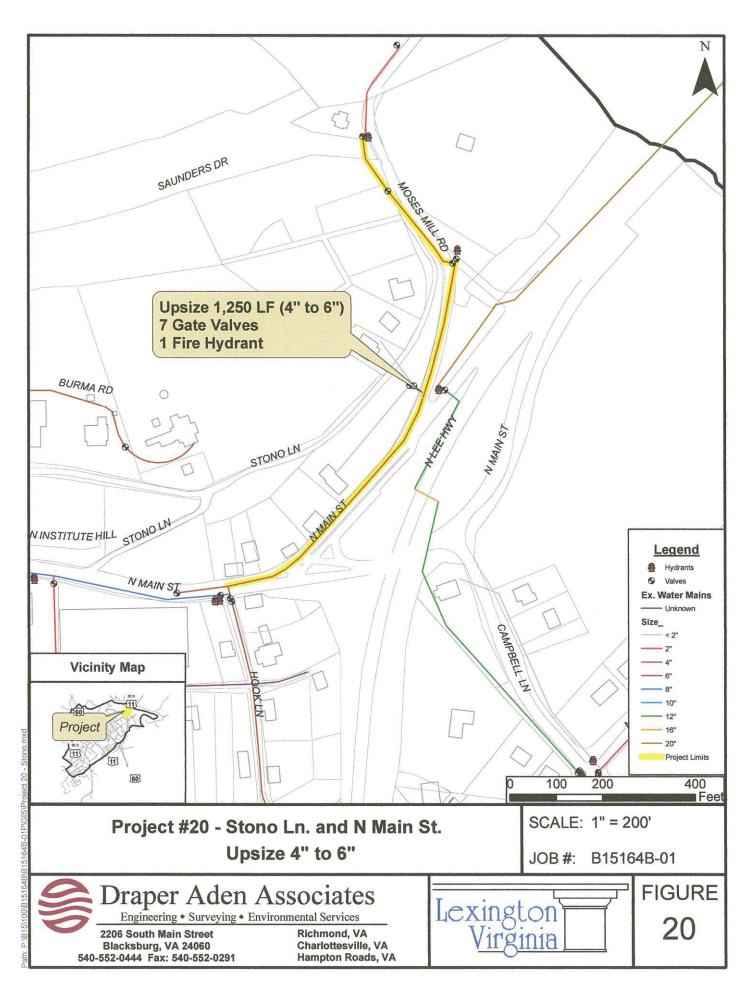

| Description: | Project includes upsizing 1,250 LF of 4-inch cast iron pipe to 6-inch ductile iron (DI) pipe. N. |
|--------------|--|
| | Main St. from Hook Ln. to Stono Ln. to Jordan's Point Park includes 1,250 LF of 6-inch DI |
| | pipe, 7 gate valves, 1 fire hydrant and approximately 6 service connections. |
| | |
| | |
| | |

| Justification: | This project will offer increased fire flow to the local residences. The pipes in this section are |
|----------------|--|
| | approximately 61 years old. The pipe is as deep as 12.5 feet in some areas making access and |
| | maintenance liability an issue. This project has public safety implications as it provides |
| | protection during a fire event. |

| Category: | Water |
| Title: | Hook Lane & Graham Lane Water System Upgrades |
| Status: | No Change |

Description: Project includes upsizing 500 LF of 4-inch cast iron pipe to 6-inch ductile iron (DI) pipe, replacing 165 LF of 2-inch pipe and abandoning 270 LF of 2-inch cast iron pipe. Hook Ln. from N. Main St. to the fire hydrant includes upsizing 500 LF of 4-inch to 6-inch DI pipe, 3 gate valves, 1 fire hydrants and approximately 7 service connections and replacing 165 LF of 2-inch DI pipe, 1 gate valve, 3 service connections and 1 blow off assembly. Graham Ln. includes abandoning 270 LF of 2-inch DI pipe, and replacing it with 2 long service connections.

Justification: This project will offer increased fire flow to the local residences. This project has public safety implications as it provides protection during a fire event. The pipes in this section are beyond their designed life cycle use as they are approximately 76 and 61 years old potentially resulting in poor water quality and high exfiltration in joints. This project has a high impact of deferral based on the age of the pipe and the potential for failure resulting in increased risk to health and safety of the community.

| Category: | Water |
| Title: | Overhill Drive Water System Upgrades |
| Status: | No Change |

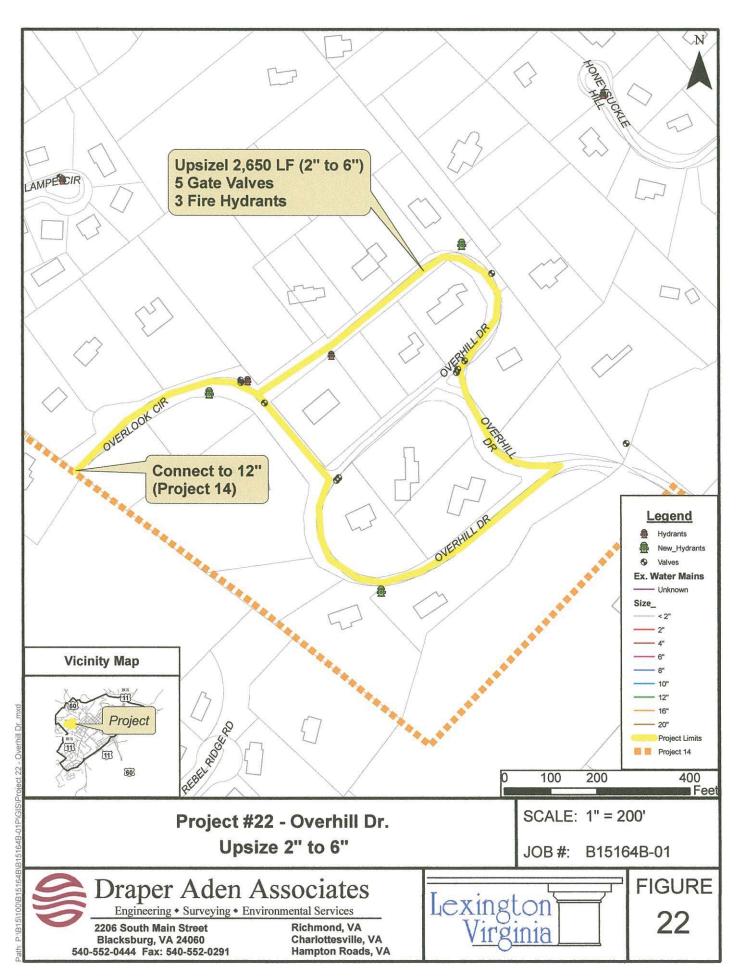

| Description: | Project includes upsizing 2,650 LF of 2-inch cast iron pipe to 6-inch ductile iron (DI) pipe. The |
|--------------|---|
| | alignment would replace the pipes in the Overhill Dr. and Overlook Cir. neighborhood and |
| | would connect to the future 12" DI pipe alignment from the Enfield Tank to the downtown |
| | area. This project includes 2,650 LF of 6-inch DI pipe, 5 gate valves, 3 fire hydrants, and |
| | approximately 19 service connections. This project will also abandon the 12- and 8-inch pipes |
| | aligned in hard to access areas. |
| | |

| Justification: | Active pipes are more easily accessible in right-of-ways rather than backyards in case of |
|----------------|--|
| | emergency. This project will offer increased fire flow to the local residences. This project has |
| | public safety implications as it provides protection during a fire event. |

UF-81

| Requesting Department: | Public Works |
|------------------------|---|
| Category: | Wastewater |
| Title: | Spotswood Drive Area Wastewater Collection Line |
| Status: | No Change |

| This project replaces approximately 1760 linear feet of existing gravity sewer pipe and |
|---|
| associated laterals along Spotswood Drive and Houston Street. Existing service line |
| connections to residences will be replaced to the property line and will include cleanouts. |
| |
| |
| |
| а |

Justification: The Jackson sewershed is amongst the oldest section of the City's infrastructure with areas dating back to the founding of the City. The infrastructure does not meet current regulations and has a history of inflow and infiltration problems as well as other problems related to the sewers age. The line has been previously tested and examined by the City personnel and is known to have I&I issues.

| Justification | The existing collection line was constructed in the 1960's and has a history of inflow and infiltration problems related to root intrusion in the lines. The lines are currently being treated |
|---------------|--|
| | for root intrusion. Root Intrusion indicates the presence of cracks and holes by which ground water and runoff may enter the sewer. |

| Title: | VMI Master Meter Installation |
| Status: | No Change |

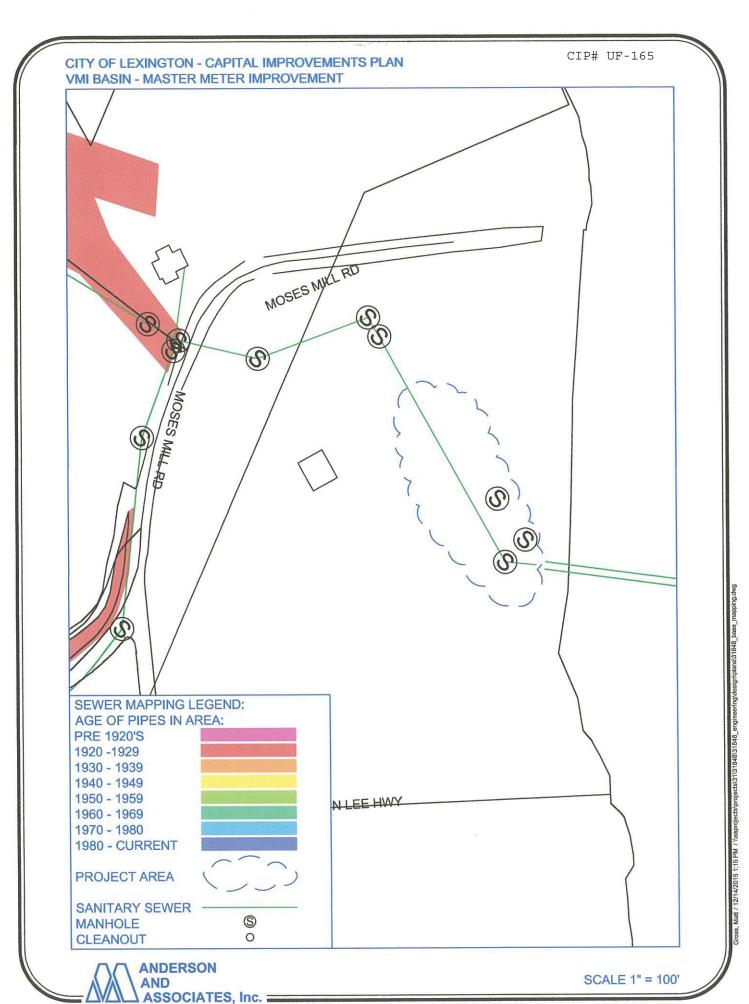

| Description: | This project will install a 12" metering manhole and new meter parallel to the existing gravity | | | | | |
|--------------|---|--|--|--|--|--|
| | sewer pipe between the rock box and the siphons at Jordan's Point Park. | | | | | |
| | | | | | | |
| | | | | | | |
| | | | | | | |
| | | | | | | |
| | | | | | | |

| The Maury Service Authority owns and operates a 12" parshall flume on the County side of the |
|--|
| siphons that is supposed to be used for the master metering of flows coming from the City of |
| Lexington. The proposed meter would be installed inside the City's gravity sewer system and |
| could be used to check against the meter owned by the Authority. |
| |
| |

| Strategic | Vision IV: Goal IV: Provide and improve infrastructure; Vision II: Goal IV: Maintain and |
|-----------|--|
| Plan: | update infrastructure and align fees with costs |
| | |
| | |
| | |
| | |

| Requesting Department: | Public Works |
|------------------------|--|
| Category: | Wastewater |
| Title: | Marshall Street Wastewater Collection Line |
| Status: | No Change |

| Description: | This project replaces about 580 feet of 6-inch wastewater collection line on Marshall Street | | | | | |
|--------------|---|--|--|--|--|--|
| | with new 8-inch PVC line. Existing service line connections to residences will be replaced to | | | | | |
| | the property line and will include cleanouts. | | | | | |
| | | | | | | |
| | | | | | | |
| | | | | | | |

| Justification: | The existing collection line is aged terra cotta pipe in poor structural condition. Frequent line | | | | | |
|----------------|--|--|--|--|--|--|
| | backups occur, typically as a result of pipe failure, which requires excavation to perform point | | | | | |
| | repairs. Owing to the poor condition of the line, it is likely subject to groundwater infiltration | | | | | |
| | after rainfall. | | | | | |
| | | | | | | |
| | | | | | | |

| Strategic | Vision IV: Goal IV: Provide and improve infrastructure; Vision II: Goal IV: Maintain and |
|-----------|--|
| Plan: | update infrastructure and align fees with costs |
